

Quality Policy

We, at **Atlas Aerospace** are committed to provide specialised aircraft modification and Training in Flight Avionics to the highest quality and leading edge technology with unparalleled customer services to individual and institutional users building partnerships with our clients by providing the highest possible level of service. We will strive to meet our customers' expectations and be recognized as one of the leading Design, Production and Implementation houses whilst maintaining the highest standards possible and ensuring the health, safety and welfare of all employees and other interested parties and protection of the environment.

We are also committed to prevention of pollution, injury and ill health and continual improvement in Quality management and Quality performance. We will work with diligence and with accordance to the current applicable local and federal rules and regulations concerning quality, environmental protection, occupational health and safety and with other requirements to which the organization subscribes.

We will manage our Quality operations to continually improve its effectiveness while developing the skills and expertise of our employees. We will ensure that they are suitably qualified, competent and equipped with understanding of the quality, health, safety & environmental objectives as the most important aspects of their work.

We will ensure that this policy is well understood at all levels of the company and is implemented through the Quality Management System. All employees and other interested parties shall be made aware to perform their duties and responsibilities according to this policy and specific organizational objectives applicable to them.
